Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a voltage sensing hand tool which includes a non-contact voltage sensing circuit and an associated alarm circuit. Each independent claim identifies the uniquely distinct features "a hand tool comprising a conductive tool head; a non-contact voltage sensing circuit electrically connected to the conductive tool head; a handle operatively connected to the tool head and housing the non-contact voltage sensing circuit including an alarm indicator to indicate that the tool head is in proximity to a live electrical wire or an electric field at an elevated voltage". The closest prior art Singer et al. (US 6,118,270) and Bystrom et al. (US 6,424,139) disclose conventional non-contact voltage sensor or measuring instrument, either singularly or in combination, fail to anticipate the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Blitshteyn et al. (US 4,716,371), and Swain (US 6,278,952) are cited to show additional non-contact meters.
